

Virgil's agricultural poem, the Georgics, forms part of a long tradition of didactic epic going back to the archaic poet Hesiod. This book explores the relationship between the Georgics and earlier works in the didactic tradition, particularly Lucretius' *De Rerum Natura* (On the Nature of Things). It is the first comprehensive study of Virgil's use of Lucretian themes, imagery, ideas and language; it also proposes a new reading of the poem as a whole, as a confrontation between the Epicurean philosophy of Lucretius and the opposing world views of his predecessors.
