

Did you know that everything in your life comes down to what you think about most often? What Do You Think? asks the reader just that. Because, what you think and how you interpret what you think, is fundamental to your success and wellbeing throughout your life... and even across your very existence. Your thoughts reflect your feelings about your experiences... and your experiences form your beliefs about your life... and when you see your beliefs manifest in line with your next experience... this reinforces that you are right in having the beliefs that you hold. But what happens when your beliefs are no longer serving your best interests? How do you change the way you feel when emotional feelings just seem to happen? This book provides a unique overview of human life in the physical realm and the way people interact in multidimensional ways with not only their planet, but also their universe. It also helps you to change your feelings and by association, change your unhelpful beliefs... and you can start right now... by feeling good about something... anything! Understand, let go and stop worrying. Join the game of life and decide how things are going to be for YOU! Please note: This book contains most of the information from How We Perform Negative Miracles, More Than You Think and More Than You Think (Compendium) and some from Quantum Mass Superstructures.
